Your work / Projects / New project / Create blank project
Create blank project
Create a blank project to store your files, plan your work, and collaborate on code, among other things.
Project name
gqs-cm-2026-2
Start with a letter, digit, emoji, or underscore.
Project URL
https://gitlab.com/
huguim142005
/
Project slug
gqs-cm-2026-2
Project deployment target (optional)
Select the deployment target
Visibility Level
Private
Project access must be granted explicitly to each user. If this project is part of a group, access is granted to members of the group.
Internal
The project can be accessed by any logged in user except external users.
Public
The project can be accessed without any authentication.
Project Configuration
Initialize repository with a README
Allows you to immediately clone this project's repository. Skip this if you plan to push up an existing repository.
Enable Static Application Security Testing (SAST)
Analyze your source code for known security vulnerabilities. Learn more.
Enable Secret Detection
Scan your code for secrets and credentials to prevent unauthorized access. Learn more.
Experimental settings
Create project
Cancel

User Settings / Personal access tokens
Personal access tokens
You can generate a personal access token for each application you use that needs access to the GitLab API. You can also use personal access tokens to authenticate against Git over HTTP. They are the only accepted password when you have Two-Factor Authentication (2FA) enabled.
Active tokens
0
Filter list
Tokens expiring in 2 weeks
0

State = Active
Expiration date
Personal access tokens
Generate token
Name
Description
Status
No access tokens
Fine-grained token
Limit scope to specific groups and projects and fine-grained permissions to resources.
Legacy token
Scoped to all groups and projects with broad permissions to resources.
Feed token
Your feed token authenticates you when your RSS reader loads a personalized RSS feed or when your calendar application loads a personalized calendar. It is

 Committer: Hugo Benicio Conrado <324125544@ulife.com.br>
Your name and email address were configured automatically based
on your username and hostname. Please check that they are accurate.
You can suppress this message by setting them explicitly. Run the
following command and follow the instructions in your editor to edit
your configuration file:

    git config --global --edit

After doing this, you may fix the identity used for this commit with:

    git commit --amend --reset-author
